

Pyroelectric Detector LHi 1128

Four Elements

Single FET Output and optical window

Quad element design

Designed for ceiling mount applications

The **LHi 1128** pyroelectric infrared detector is a special design for motion control in ceiling mount applications. It includes a Quad type pyroelectric ceramic with 4 sensitive elements connected to one FET in source follower connection. Thus it offers a single channel output.

The **LHi 1128** detector is available in **TO-5** housing with infrared filter.
